Berthold Types

A new approach to licensing

Not only is the Berthold Exclusiv Collection considered one of the most significant type collections of the twentieth century but it also boasts some of the most realistically priced and structured licensing terms available today.

The uniquely flexible licensing system which Berthold have introduced means that with a single payment you can have site-wide, country-wide or world-wide rights to use any font from this legendary and comprehensive collection. This radical new approach of licensing the font data represents a real alternative to traditional licensing by printer and CPU.

The only restriction is that the fonts are not re-sold.

The license you receive with your one-off payment will remain valid regardless of any future upgrades to your equipment or expansion to your organisation. These special terms are unique to Berthold Types Limited and represent a real breakthrough in the cost-effective purchase and pragmatic use of type.

So if you're producing a campaign that requires type for wider use than is normally provided—or that requires company, country or world-wide usage—the Berthold Exclusiv Collection is a type library that you really must consider — both from a practical and a stylistic viewpoint.
